Dear Mother, Dad and Bill,

How are you all?

I can't remember; did I write and thank you for the pictures of Bill? I think I did.

I have darn little, if anything, to say. I have fallen pretty much into a routine, although an enjoyable one. Was down in New York City again this weekend, but saw little of Holly and Susan, as they went to Watch Hill, Rhode Island, to spend the weekend with Susans folks, her sister and nephews (2) and her other brother-in-law, ~~the~~ Sidney Harris. He works for Space and Co. in Suva, then, where he is been for the past three years. Now he is on a 4 month vacation, 6 weeks of which he will spend in Europe - starting Monday. A very nice guy.

The job is still fun, but I am disappointed that I have not had to work much lately, that is due to the fact that 6 hours every night the 1410 computer is scheduled by programmers and

2.

customers, we have only 2 hours left in which to do approximately 6 hrs worth of work. This means that we work like crazy for those two hours and try to accomplish as much as possible. Then the rest of the evening we just sit around, drink coffee, read or write letters (such as now).

This week the State of Louisiana has 2 hours of 1401 time scheduled every night.

The weather here in Endicott is miserable. Much worse than in Portland. The summers are ~~bad~~ bad in that it is almost always very hot, very humid and overcast* and I understand the winters are miserably severe. At least in Portland the summers are enjoyable. Last year they had 69 days straight with no sun and it has been pretty much the same this year.

One of these days I'll finish off the roll of film that's been in my camera for several months, and see if there isn't a fairly recent picture of me. Then if you wish, I will send it to you.

* And it rains most every day.

3.

If you have any pictures of you or dad, or any more of Bill, I would like to have them.

Oh yes, Holly and Susan recently bought a new stereo set-up, which they will have delivered to their new apartment. It consists of two BOZAL speakers, a FISHER amplifier and a GERRARD changer-tuntable. It is one the best sounding sets I've ever heard.

That's all for now.

Write.

Love,
Pete
